

Our seed mixes aren't just for groundcover

Teller-Park Conservation District has worked with experienced soil conservationists and seed professionals to create seed blends that provide ground cover to prevent erosion control and palatable forage for cattle. These seed blends also enhance functionality of biological systems in our two counties.

You may find that some seed mixes on the market include species that are poorly adapted to our environment or worse, they include species that are invasive and take over native grass stands.

The seed mixes we sell are comprised of native species and non-invasive introduced species—and all are adapted to the unique climate and altitude of Teller and Park Counties.

Additional benefits

Grass stands sown with these seed blends have the added benefit of resilience and will withstand the harsh conditions that can be common to this area. These grasses also provide suitable forage and necessary cover for wildlife of the Pikes Peak region.

A Word about Native Species

Native species are adapted to local seasons, droughts, fire, etc. and may lead to greater survival than introduced species. Native species are better for birds, pollinators, and other insects and wildlife. Wildlife—big and tiny—requires a healthy, functional biological system.

About TPCD

The Teller-Park Conservation District was formed in 1942.

As one of nearly 3000 conservation districts nationwide, we are helping people conserve land, water, forests, wildlife and related natural resources. We share a single mission to coordinate assistance from public, private, local, state, and federal partners to develop locally driven solutions for natural resource concerns.

Education is a vital part of our mission. We participate in local events and conduct workshops talking to folks about conservation topics, such as noxious weeds. We also provide

education programs for school children and adults. Stop by our office for more information and to purchase custom seed mixes for native pasture, rangeland restoration, and pollinator-friendly wildflowers—seed mixes specific to our altitude and growing conditions.

Grass & Wildflower Seed Mixes

We live, we die, and like the grass and trees, renew ourselves from the soft earth.

Chief Joseph, Nez Perce
1840-1904

Office Hours:

Tuesday thru Thursday 8:00 am – 4:00 pm

Teller-Park Conservation District

Buffalo Brand Low Grow Mix

Rate: 15-25 lb. /acre OR 1-2 lb. per 1000 sf

\$20.50 / 5 lb.

\$41.00 / 10 lb.

- BI 30% Crested Wheatgrass, Ephraim
- BI 25% Perennial Ryegrass, VNS
- BN 20% Sheep Fescue, VNS
- BI 15% Chewing Fescue, Jamestown IV
- BI 10% Canada Bluegrass, Ruebens

This is a quick establishing mix of cool season grasses for use in most any soil type. Lower growing grasses for minimal mowing.

BN = Bunch-forming, Native

SN = Sod-forming, Native

BI = Bunch-forming, Introduced

SI = Sod-forming, Introduced

Western Wheatgrass

Arizona Fescue

Blue Grama

Slender Wheatgrass

Crested Wheatgrass

Mountain Brome

TP South Park Mix

Rate: 14-20 lb. /acre

\$35.00 / 5 lb.

\$70.00 / 10 lb.

- SN 28.78% Western Wheatgrass
- BN 19.94% Mountain Brome
- BN 9.83% Arizona Fescue
- SN 9.71% Blue Grama
- SN 9.56% Sandburg Bluegrass, Mtn Home
- BN 9.51% Slender Wheatgrass
- BN 4.95% Indian Ricegrass

This productive and palatable seed blend is ideal for grazing or soil stabilization. This mixture was created to suit the higher and drier environments of Park County but can be used throughout both Teller and Park Counties.

TP Dryland Pasture Stabilization Mix

Rate: 20-35 lb. /acre

\$125.00 / 25 lb.

- SI 30% Pubescent Wheatgrass
- BN 20% Slender Wheatgrass
- BI 20% Meadow Brome
- BI 15% Forage Perennial Ryegrass
- BI 10% Orchardgrass
- SN 5% Snake River Wheatgrass

This productive and palatable mix of non-invasive grasses is suitable for grazing or where high biomass is needed for soil stabilization.

Prices include 8.49% sales tax

Buffalo Brand Mountain Western Wildflower Mix

Rate: 6-12 lb. /acre OR 4 oz. per 1000 sf

\$38.00 / 1 lb.

Meadow Mix: Perennial Lupine, Perennial Gaillardia, California Poppy (orange), Annual Candytuft, Blue Flax, Corn Poppy (mixed), Dwarf Blue Coneflower, Polka Dot Mix Cornflower, Indian Blanket, Rocky Mountain Penstemon, Green Thread, Prairie Aster, Clarkia, Globe Gilia, Dwarf Evening Primrose, Palmer Penstemon, Prairie Coneflower, Deerhorn Clarkia, Plain Coreopsis.

All suggested rates are for broadcast method and are determined by soil condition, soil preparedness, and planting purpose.
